

Soji™ Base Unit Stake Instruction Set

Congratulations on the purchase of your Soji™ Base Unit Planting Stake!

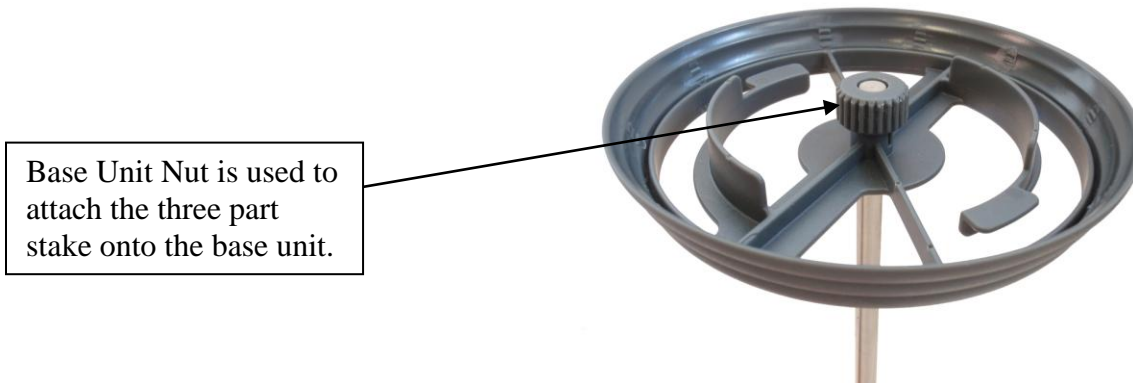

Parts Included in Package:

- 1.) Three part stainless steel planting stake

Important Note: For the three part stake to work properly you must already have a Soji™ Base Unit.

Step One: Screw together the three separate portions of the planting stake to create one fully built unit. Take note of the end of the stake equipped with the planting stake tip.

Step Two: Attach the three part planting stake onto the Soji™ Base Unit by un-screwing the nut on the inside of the base unit. Slide the stake onto the bottom of the base unit and tighten the nut to secure the base unit to the three part planting stake.

Step Three: Attach the Soji™ Base Unit (with three part planting stake already attached) to the Soji™ Solar Lantern.

The bottom of the Soji™ Base Unit is the flat side that will sit flush on a flat surface.

To attach the base unit line up the empty triangle spaces with the lantern's wire rings

For visual instructions on how to properly attach base unit to lantern, please see our instructional video on YouTube.com: <http://www.youtube.com/watch?v=dKD4EoNYxF8>

● Important note:
position base so that wider side
attaches to lantern

Hook the tabs onto the inside
of the lantern by squeezing
them one at a time.
